Sir:

Prior to examination upon the merits, kindly amend  
as follows:

Delete claim 1, and insert the following claims:

--73. Recombinant microbial cell comprising

i) a first enzyme activity controlling  
assimilation of a nitrogen nutrient source,

wherein the first enzyme activity is encoded  
by a first nucleic acid operable linked to an  
expression signal not natively associated with  
the first nucleic acid, and

wherein the expression of the first enzyme  
activity is increased as compared to the  
expression of the first enzyme activity when
